

# How to make: Ribbon Bike Streamers

Spruce up your bike with this great summer craft.

## YOU WILL NEED:

- Ribbon
- Rubber bands x4
- Scissors

### STEP 1.

Choose some colourful ribbon and cut it to the desired length (remember it will need to be folded in half). We recommend at least 4 pieces of ribbon (approx. 22 inches each in length) for each handlebar.

### STEP 2.

Tie a rubber band around the top of the folded ribbons to create a small loop at the top of each streamer.

### STEP 3.

Now thread a rubber band through each ribbon loop and pull back through itself so that it is tight.

### STEP 4.

Use the elastic band loop to place over the edge of the bike's handlebars.

Step 1

Step 2

Step 3

Step 4

This is a fun and simple project that older children can complete on their own, or younger kids can do with a little help!
